Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscript that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfill the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A 0S2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

Contents of Volume 81

- Arif M, Inooka H: Iterative manual control model of human operator 445
- Baselli G → Porta A
- Bergey GK → Franaszczuk PJ
- Bernasconi C, König P: On the directionality of cortical interactions studied by structural analysis of electrophysiological recordings 199
- Bhushan N, Shadmehr R: Computational nature of human adaptive control during learning of reaching movements in force fields 39
- Biscay R → Valdes PA
- Blumenthal T → Melkonian D
- Bobbert MF, van Zandwijk JP: Sensitivity of vertical jumping performance to changes in muscle stimulation onset times: a simulation study 101
- Borisyuk R, Hoppensteadt F: Oscillatory models of the hippocampus: A study of spatio-temporal patterns of neural activity 359
- Bortolan G → Casaleggio A
- Boyle R → Holly JE
- Breidbach O → Holthausen K
- Camhi JM → Ezrachi EA
- Cartwright AD, Curthoys IS, Gilchrist DPD: Testable predictions from realistic neural network simulations of vestibular compensation: integrating the behavioural and physiological data 73
- Casaleggio A, Bortolan G: Automatic estimation of the correlation dimension for the analysis of electrocardiograms 279
- Cattaert D, Semjen A, Summers JJ: Simulating a neural cross-talk model for between-hand interference during bimanual circle drawing 343
- Cerutti S → Porta A
- Chiel HJ → Yu S-N
- Clarke PGH → Posada A
- Cocatre-Zilgien JH, Delcomyn F: Modeling stress and strain in an insect leg for simulation of campaniform sensilla responses to external forces 149
- Crago PE → Yu S-N
- Crane BT, Demer JL: A linear canal-otolith interaction model to describe the human vestibulo-ocular reflex 109
- Curthoys IS → Cartwright AD
- Delcomyn F → Cocatre-Zilgien JH
- Demer JL → Crane BT
- Diesmann M → Rotter S
- Dolev D → Sivan E
- Ezrachi EA, Levi R, Camhi JM, Parnas H: Right-left discrimination in a biologically oriented model of the cockroach escape system 89
- Franaszczuk PJ, Bergey GK: An autoregressive method for the measurement of synchronization of interictal and ictal EEG signals 3
- Gielen CCAM → van Bolhuis BM
- Gilchrist DPD → Cartwright AD
- Gordon E → Melkonian D
- Grillner S → Kotaleski JH
- Guttmann J → Reisch S
- Hause T → Neumann H
- Holly JE, McCollum G, Boyle R: Identification of head motions by central vestibular neurons receiving linear and angular input 177
- Holthausen K, Breidbach O: Analytical description of the evolution of neural networks: learning rules and complexity 169
- Hoppensteadt F → Borisyuk R
- Houk JC → Hua SE
- Hua SE, Houk JC, Mussa-Ivaldi FA: Emergence of symmetric, modular, and reciprocal connections in recurrent networks with Hebbian learning 211
- Inooka H → Arif M
- Jimenez JC → Valdes PA
- Kistler WM, Leo van Hemmen J: Delayed reverberation through time windows as a key to cerebellar function 373
- König P → Bernasconi C
- Kotaleski JH, Grillner S, Lansner A: Neural mechanisms potentially contributing to the intersegmental phase lag in lamprey 317
- Kotaleski JH, Lansner A, Grillner S: Neural mechanisms potentially contributing to the intersegmental phase lag in lamprey 299
- Lánský P, Rodriguez R: The spatial properties of a model neuron increase its coding range 161
- Lansky P → Migliore M
- Lansner A → Kotaleski JH
- Leo van Hemmen J → Kistler WM
- Levi R → Ezrachi EA
- Liou C-Y, Yuan S-K: Error tolerant associative memory 331
- Lombardi F → Porta A
- Malliani A → Porta A
- Manahilov V, Simpson W: Energy model for contrast detection: spatiotemporal characteristics of threshold vision 61
- McCollum G → Holly JE
- McGinty D → Nakao M
- Meinhardt G: Evidence for different nonlinear summation schemes for lines and gratings at threshold 263
- Melkonian D, Blumenthal T, Gordon E: Numerical Fourier transform spectroscopy of EMG half-waves: fragmentary-decomposition-based approach to nonstationary signal analysis 457
- Migliore M, Lansky P: Computational model of the effects of stochastic conditioning on the induction of long-term potentiation and depression 291
- Montano N → Porta A
- Mussa-Ivaldi FA → Hua SE
- Nakao M, Nishiyama H, McGinty D, Szymusiak R, Yamamoto M: A model-based interpretation of the biphasic daily pattern of sleepiness 403
- Neumann H, Pessoa L, Hause T: Interaction of ON and OFF pathways for visual contrast measurement 515
- Neumann H, Sepp W: Recurrent V1-V2 interaction in early visual boundary processing 425
- Nishiyama H → Nakao M
- Ozaki T → Valdes PA
- Parnas H → Ezrachi EA
- Parnas H → Sivan E
- Pessoa L → Neumann H
- Porta A, Baselli G, Lombardi F, Montano N, Malliani A, Cerutti S: Conditional entropy approach for the evaluation of the coupling strength 119
- Posada A, Clarke PGH: The role of neuronal death during the development of topographically ordered projections: a computational approach 239
- Price H → Wallace R
- Reisch S, Steltner H, Timmer J, Renotte C, Guttmann J: Early detection of upper airway obstructions by analysis of acoustical respiratory input impedance 25
- Renotte C → Reisch S
- Riera J → Valdes PA
- Rodriguez R → Lánský P
- Rotter S, Diesmann M: Exact digital simulation of time-invariant linear systems with applications to neuronal modeling 381
- Semjen A → Cattaert D
- Sepp W → Neumann H
- Shadmehr R → Bhushan N
- Simpson W → Manahilov V
- Sivan E, Parnas H, Dolev D: Fault tolerance in the cardiac ganglion of the lobster 11
- Steltner H → Reisch S
- Stroeve S: Impedance characteristics of a neuromusculoskeletal model of the human arm I. Posture control 475
- Stroeve S: Impedance characteristics of a neuromusculoskeletal model of the human arm II. Movement control 495

Summers JJ → Cattaert D
Szymusiak R → Nakao M

Timmer J → Reisch S

Valdes PA, Jimenez JC, Riera J, Biscay R,
Ozaki T: Nonlinear EEG analysis based
on a neural mass model 415

van Bolhuis BM, Gielen CCAM: A
comparison of models explaining muscle
activation patterns for isometric
contractions 249

van der Linde RQ: Passive bipedal
walking with phasic muscle
contraction 227

van Zandwijk JP → Bobbert MF

Vidybida AK: Cooperative mechanism for
improving the discriminating ability in
the chemoreceptor neuron Binomial
case 469

Wallace R, Price H: Neuromolecular
computing: a new approach to human
brain evolution 189

Wright JJ: Simulation of EEG: dynamic
changes in synaptic efficacy, cerebral
rhythms, and dissipative and generative
activity in cortex 131

Yamamoto M → Nakao M

Yu S-N, Crago PE, Chiel HJ:
Biomechanical properties and a kinetic
simulation model of the smooth
muscle I2 in the buccal mass of
Aplysia 505

Yuan S-K → Liou C-Y
